

Grant Opportunities & News You Can Use

Hello faculty,

We hope your summer promises time for both research productivity and relaxation.

This newsletter highlights Humanities New York, formerly known as the New York Council for the Humanities, as our [Featured Funder](#). We take a look at the increasing prevalence of preliminary proposals or letters of inquiry in the [Sage Advice](#) column.

Scroll or click to [page four](#) for profiles of several opportunities due in August and September. [Guggenheim Fellowships](#) should be coming due in mid-September, if this year follows the timing of years past. [NEH grants](#) this summer support collaboration between humanities faculty and their science and social science colleagues. Sociologists and political science scholars should be aware of upcoming August deadlines for [NSF grants](#). The [Spencer Foundation](#) keeps a steady stream of Small Research Grant deadlines flowing, the next of which is August 1. For [scientists](#), Eppley Foundation Grants and Sloan Research Fellowships are coming due in mid-September. Don't miss the [News](#) this month. It has pictures!

Beginning on [page nine](#), we list deadlines through November grouped by discipline.

For deadlines throughout the year, see the Grants Calendar, perpetually in progress, on the Barnard website at [External Grant Opportunities](#). You can download a copy of your very own to sort, search, and filter at will.

If you would like assistance in finding grants for an upcoming project or would like to begin an application process, please contact [Kari Steeves](#). As always, feel free to send any comments, requests, or suggestions to us [here](#).

Humanities New York

The New York Council for the Humanities underwent a brand boost in November 2016 that introduced a new name—Humanities New York, new [website](#), and “a new logo that references both a speech bubble and the place where conversation is being sparked—New York State. Its clean modern design refers to the accessible, open, and participatory values of Humanities New York.” Most funding is directed at “public-facing” programming aimed to increase conversation in New York around “issues of civic engagement and trust and to strengthen the bonds of community in New York.”

GRANT FUNDING

Humanities New York offers three grant types:

- **Quick Grants**—“grants of \$500 are now available for in-person public humanities programs. These matching grants are intended for small and volunteer-run organizations. Proposals will be accepted on a rolling basis while funds last.”
- **Vision Grants**—“Up to \$1,500 in support of brainstorming, researching, and professional development for organizations working collaboratively to develop new ideas and program strategies. These grants aim to:
 - Support emerging and established partnerships between different groups on a shared project that may develop into public-facing activities.
 - Infuse program design with humanities themes and methodologies from the start.
 - Encourage experimentation in program design.
 - Build community input into program design.
- **Action Grants** — Up to \$5,000 to produce public-facing humanities projects that encourage audiences to reflect on their values, explore new ideas, and engage with others across New York State. These grants require organizations to demonstrate a match of at least one-to-one. These grants aim to:
 - Connect audiences more deeply to the communities where they live and work.
 - Solidify community partnerships and diversify audiences.
 - Creatively employ the tools of the humanities to respond to issues and ideas capturing the imagination and passion of New Yorkers today.

Recent \$5,000 grants have gone to City College “Dominican Studies Institute for an exhibit that seeks to create and showcase images of original colonial manuscripts from the sixteenth century pertaining to the first black African people who arrived or were forcefully brought to La Española, the first European colony in the Americas” and Lebanese American University’s New York Academic Center to “host Syria Resilient, a series of five free public events ranging from the visual and performing arts to political analysis.”

PROGRAM FUNDING

Humanities New York also designs programs and provides micro-grants for organizations to use in collaboration with a scholar or facilitator of their choosing. Programs range from \$150 for a single gathering Community Conversation to \$1000 for multiple session Reading and Discussion Programs with reading lists provided. [<<more>>](#)

Sage Advice for Competitive Proposals

Funding agencies and foundations often solicit **preliminary proposals** (or letters of inquiry) to reduce the work that goes into grant-making, for both themselves and applicants. Preproposals are quicker and less complicated to submit. The drawback is that more people are likely to take the trouble, sometimes lowering acceptance rates compared to opportunities that require a full-blown application.

So, should applicants take a different approach when writing preproposals? Some of the old truisms apply—things like follow the instructions and reach out to your program officer. A preproposal, however, “is not just a condensed version of a full proposal,” writes Karen M. Markin in the January 2015 issue of *The Chronicle of Higher Education*. “Remember, the purpose of the preproposal is to excite at least one member of the review panel enough to advocate for a full proposal from you. A faculty member I know offered a good analogy: Think of the preproposal as a movie trailer for your full proposal. You need to sell reviewers on the idea, establish its scientific soundness, and document your ability to carry out the proposed work.”

In his blog post, “[On Writing a Strong NSF Preproposal](#)” Mike Kaspari begins with the first point of contact: the title. “Craft a title that interests non-specialists in your field,” he says. Actually, he suggests applicants, “craft 5 titles for your pre-proposal and market test them—in your lab or among your colleagues—to find which one sparks the most interest. If you are like me, you will be surprised as to how often the consensus is not your favorite.”

Markin advises applicants to “use your publications list to illustrate your ability to use the methodology you propose.” Joan E. Strassmann, in her blog post “[How to Write a Successful NSF Preliminary Proposal](#),” goes even further. She observes, “Some people seem to think if they don’t cite something, we (the reviewers) won’t know about it and will think they are more creative than they are. Don’t use this ostrich’s-head-in-sand strategy. Odds are we know the references you are ignoring, as well as some others you should know about, but do not. Science is a cooperative, synthetic endeavor.... Reference it and show how your work differs and complements.” Strassmann also says, “It is easier on the reader if you put author, year in the text rather than a number for the reference, if you can take the space.”

Speaking of how to use precious space, Markin notes, “In my conversations with successful applicants, many have said it helps to have preliminary data in the preproposal.” Strassmann offers a caveat: “A few pithy sentences and some references is likely to be all you can fit. Remember, more than anything, this stage is about making the reviewers excited enough about the questions to want to see the full proposal.” Or even easier on the eyes, Strassmann recommends including a figure. “A figure...breaks up the monotony of language and brings in the dance of art. The figure should be important. I love figures that explain the experiments. A figure showing crucial background data could also be useful. Just remember, space is very limited, and the figure and its caption need to meet the same text size rules as the rest of the proposal.”

The good news, Markin notes, is that, “because the application is short, lots of people apply and some of their applications are not carefully prepared. By putting some thought into yours, you already have an advantage.”

The Foundation does not fund work that can qualify for funding from conventional sources such as the National Science Foundation or the National Institutes of Health, or similar agencies at the state level. New Human Subject System for your RPPRs will be in effect next month:

“...[T]he new Human Subject System (HSS) is scheduled to go live on June 9, 2018 and will be replacing the Inclusion Management System (IMS). HSS is a shared system that enables grant recipients to electronically report and update their data on human subjects and clinical trials to NIH. The system will also allow NIH agency staff to monitor and manage the data.

As of June 9, Principal Investigators and Signing Officials will no longer see “Inclusion” links as an action option, but instead will see “Human Subjects” links on both the Status Search screens and in section G.4.b of the Research Performance Progress Report (RPPR). The RPPR Human Subjects

Deadline Reminders (cont'd)

link will only be displayed if the award involves human subjects.

On June 9th, IMS will be taken offline and all IMS data submitted to NIH by June 8, 2018 will be migrated to the new system. Now this is important... Updates to the enrollment records in IMS must be submitted no later than Friday, June 8. Updates not submitted by June 8 will not be available in HSS and will need to be re-entered into HSS. Incomplete records, those records not submitted by a Signing Official to NIH by June 8, will not be migrated.

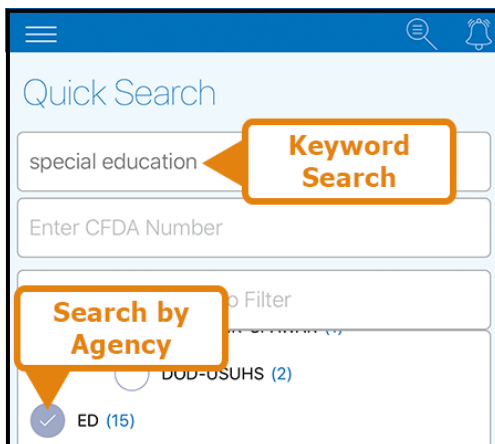

For more information on this transition, please see [Guide Notice NOT-OD-18-179](#). You can also reference our [HSS Overview](#) and [HSS Training](#) pages.

A growing number of HSS tutorial videos can be found in the [Human Subjects section](#) of the [eRA Videos Tutorials](#) page."
