

Grant Opportunities & News You Can Use

Hello, faculty,

Greetings! We hope you are settling in to the semester and aren't too swamped.

This month we are back with a [Featured Funder](#) column on The American Academy in Rome. Most people know it from the Rome Prize, but it has a number of affiliated fellowships worth checking out. For our [Sage Advice](#) column, we have advice on "When to Visit the Sponsored Research Office – A Timeline for Your Early Years." This one is directed at new faculty in the humanities and social scientists, so if that's you and you've ever wondered when you should start thinking about fellowship applications, be sure to check it out.

After Sage Advice, we have a few [news stories](#), including some updated NSF policies about Current and Pending documents. (We haven't forgotten you, scientists!)

As per usual, we have [brief profiles of upcoming opportunities](#) and a [calendar of opportunities](#) coming due in the next six months.

The next [Internal Grant deadline](#) is November 30, for Barnard Faculty Research Grants.

As always, if you need assistance finding grants or beginning an application, please feel free to email any of the members of the [Institutional Funding and Sponsored Research](#) team. We love to hear from you!

The American Academy in Rome

It is not clear when, exactly, the group of sculptors, artists, and architects tasked with planning the 1893 Chicago World Fair came up with the idea of creating a school in Europe where American artists could refine their skills. Maybe it emerged gradually from a new appreciation of the United States' place in a broader world as they planned the exhibitions that would best showcase each country's national culture. Or maybe they were impressed by the developments in the fine arts coming out of late nineteenth-century Europe as countries shipped works by Claude Monet and Pierre-August Renoir, among others. Personally, though, I like to think that it was the opening ceremony that clinched it. Standing in front of an enormous American flag, President Grover Cleveland pressed a telegraph button, causing water to burst out of electric fountains, drapery to fall from an enormous gold statue of the goddess of liberty, 700 banners to unfurl in unison, and a 5,000-person choir to burst into Handel's "Hallelujah Chorus." I can't help but imagine a group full of wealthy, cultured elites watching the display and thinking, "Maybe a little Old World polish wouldn't be the worst thing."

Whenever the exact moment, whatever the cause, 1893 was undoubtedly the moment that the idea of the [American Academy in Rome](#) first came into being. In the early years there was no school, just a handful of scholarships provided by Columbia University and Pennsylvania State University to subsidize artists and architects as they travelled to Rome. In fairly short order, the organization rented out a building and opened as the American School of Architecture in Rome. For a few years the organization floundered, incorporating and issuing stock, but never really establishing a firm financial foundation. It dissolved in 1897 and re-formed as the American Academy in Rome.

Advocates of the institution successfully introduced a bill in Congress to make the Academy a national institution in the early twentieth century. Soon after the Academy received funding from Harvard, The Carnegie Foundation, J.P. Morgan, J.P. Morgan Jr., John D. Rockefeller, The Rockefeller Foundation, William Vanderbilt, and others. In 1912, it merged with the American School of Classical Studies and ever since has given out fellowships to both artists and scholars, including Salvador Dali, Joseph Brodsky, Aaron Copland, and Robert Penn Warren, to name a few. Today the Academy hosts scholars through its own prizes and through prizes from affiliated institutions.

[The Rome Prize](#) supports "innovative and cross-disciplinary work in the arts and humanities. Each year, the prize is awarded to about thirty artists and scholars who represent the highest standard of excellence and who are in the early or middle stages of their careers." **Deadline: November 1, 2020**

"The [ACLS/Frederick Burkhardt Residential Fellowships](#) supports a nine-month residency at any one of twelve national research centers and libraries, including the American Academy in Rome." **Deadline: TBA Funding: \$95,000.**

"The Council of American Overseas Research Centers (CAORC) [Multi-Country Fellowship Program](#) supports advanced regional or transregional research in the humanities, social sciences, or allied natural sciences for US doctoral candidates and scholars who have already earned their PhD. Preference will be given to candidates examining comparative and/or crossregional research. Applicants are eligible to apply as individuals or in teams." **Deadline: Annually in January. Funding: \$11,000**

[Oscar Broneer Traveling Fellowship](#) "is awarded for research in Greece and Italy in alternate years... It is expected that the fellow will use the American Academy in Rome as a base from which to pursue work through trips to sites, museums, or repositories of materials relevant to the fellow's research." **Deadline: TBA. Funding: \$30,000.**

Sage Advice

When to Visit the Sponsored Research Office— A Timeline for Your Early Years

You might not know this, but we on the Sponsored Research team are on a bit of a campaign to get more faculty from the humanities and social sciences to come to our office. (Scientists are a separate case—they are much more likely to have a sense of the services we can offer and often need our help to submit grant applications, so they know to come to us early, sometimes before they have even started teaching.) But we also know that if you are in the humanities or social sciences you probably haven't spent much time interacting with a Sponsored Research Office, so it might not seem obvious when to see us or why.

We've [written before](#) about why to see us, so for today I want to focus on **when**. Because it turns out that there's a fairly standard timeline to follow if you want a fellowship for your SAPL leave to burnish your CV, (possibly) give you extra time, and make your case that much stronger for tenure.

Year One

It's never a bad idea to meet with us. If you have the mental energy to do it in your first year, great. There are lots of things we can help you with—we can research funding options, help you think about a timeline for applying, start looking for travel grants or grants for the following summer. Honestly, though, you are probably swamped and overwhelmed your first year, so don't worry about it if this just isn't a priority for you this year. The only caveat here is if you are looking for funding for the following summer—if you are looking to apply for an NEH summer stipend (which we hope some of you do!), you should be aware that the internal deadline is in mid-September, so you'll probably want to talk to us during the summer between your first and second years.

Year Two

This is when you need to start thinking about your SAPL year. (I know, I know. Still.) NEH fellowships are due in April, with a projected start date of January the following year, so if you're interested in applying to that and have worked out your leave situation with your department, I would recommend seeing us at some point during spring semester to talk about the application in advance of the deadline.

Definitely come see us during the summer between your second and third year, if you haven't already. A huge number of fellowships are due in September and October. (Think the Fulbright, ACLS, the various Institutes for Advanced Study, etc.) Since the fellowships you apply for in your third year will fund your fourth year leave, you'll want to have all of your options and deadlines straight so you are all set to go in the fall. We can make sure you're not overlooking anything. If you have the bandwidth, this is also a great time to send us a draft of your application. You'll be sending a version of the same proposal everywhere, so why not take some time over the summer to get some feedback and perfect it?

This is also the time to let your recommenders know that you'll need their help and to start talking with your Chair if you're looking for more time off than the standard year.

Year Three

Hopefully you've got a proposal you feel great about and your recommenders are all lined up, so apply like crazy! Don't forget to let us know where you're applying, so we can fill out routing forms, and what the outcome is when you hear back!

We're happy to see you at any stage of your career. As a general rule of thumb, consider reach out 12-18 months before your anticipated leave to talk about your options.

NSF selects Sean Jones to head Mathematical and Physical Sciences directorate

Posted on September 29, 2020 by NSF Staff

The U.S. National Science Foundation has selected Sean Jones to serve as head of the Directorate for Mathematical and Physical Sciences.

Jones has worked as an innovator in the field of materials science; an advocate for inspiring and training the next generation of researchers and skilled workers; and a leader at NSF, committed to institutional improvements that serve the science and engineering community as well as the public. He has served with NSF for more than a decade, starting as a program director in 2009 and most recently heading the MPS Directorate as acting assistant director.” [<<more>>](#)

New Question for Project Reports with Active Other Support Changes

- On October 5, 2020, NSF will add the following new question to the Edit Participants screen: *Has there been a change in the active other support of the PI/PD(s) since the last reporting period?* If Principal Investigators (PIs)/Project Directors (PDs) and co-PIs/co-PDs select “Yes,” they will be required to upload their most up-to-date Current and Pending Support document in an NSF-approved format to notify NSF that active other support has changed since the award was made or since the most recent annual report.
- Current and Pending Support documents not in an NSF-approved format will trigger a compliance error preventing document upload and submission of the annual or final project report.
- The NSF-approved formats for Current and Pending Support are [SciENCv: Science Experts Network Curriculum Vitae](#) and an [NSF fillable PDF](#).
- The NSF [Current and Pending Support](#) website includes additional information as well as links to

system-related Frequently Asked Questions (FAQs) for both NSF-approved formats. A set of policy-related [FAQs related to current and pending support](#) is also available.

- The complete lists of FastLane and Research.gov automated proposal compliance checks effective October 5, 2020, are available on the [Automated Compliance Checking of NSF Proposals website](#).

Reminder: NIH Policy on Use of Hypertext in NIH Grant Applications

Posted on October 1, 2020 by NIH staff.

“The use of hypertext (e.g. hyperlinks and URLs) in NIH applications is restricted due to concerns including reviewer confidentiality, “overstuffing” applications, review consistency, and malware.

There is no change in the NIH policy on the use of hyperlinks.” [<<more>>](#)

More Thoughts on Cyber Safety and NIH-Funded Research

Posted on October 1, 2020 by Mike Lauer

“October is National Cybersecurity Awareness Month. In recognition, we are reminding our extramural research community about the importance of prioritizing cybersafety across all functions of your organization and understanding how important it is to practice cyber-safe behaviors every day. As we have discussed in previous posts here and here, our current virtual environment makes it more important than ever that we stay vigilant and maintain strong cybersecurity protocols. In this post, we would like to remind you of some of the important cybersecurity policies that apply to your NIH-supported research. These policies are designed to protect not only the NIH, but also you, your

coworkers, your study participants, your institution, and your research. As healthcare and research institutions continue to face mounting threats from cyberattacks, it's important that we all not only know how to protect sensitive information, but also make a personal commitment to keeping data safe." <<more>>

New "All About Grants" Podcast – Research Misconduct

From *NIH Extramural News* by NIH Staff. Posted on September 15, 2020

"That's a bit...odd. That gel image looks photoshopped. The data looks too good to be true. And, wait a second, that figure appeared in another paper!

These are examples of research misconduct. What do you do if you suspect research misconduct? Join us for this next installment of NIH's All About Grants podcast with Dr. Christine Ring on addressing research misconduct (MP3 / Transcript). As an NIH Research Integrity Officer, she will share with us what is meant by fabrication, falsification, and plagiarism, how it affects the integrity of our supported research, what to do if you suspect research misconduct, how we work with the HHS Office of Research Integrity when responding to an allegation, and much more." <<more>>

Trump Expands Ban On Racial Sensitivity Training To Federal Contractors

From *NPR*, by NPR staff. Posted September 22, 2020.

"President Trump on Tuesday said he had expanded a ban on racial sensitivity training to federal contractors.

"His administration had instructed federal

agencies to end such training earlier this month....Last week, Trump announced efforts to promote "patriotic education" and railed against students learning about systemic racism.

"He signed an executive order that requires contracts to now include a provision that says contractors with the federal government will not have 'workplace training that inculcates in its employees any form of race or sex stereotyping or any form of race or sex scapegoating' or face the cancellation of contracts." <<more>>

Millions of animals may be missing from scientific studies

From *Science* by Dalmeet Singh Chawla. Posted on October 14, 2020

"Most animals used in biomedical experiments are not accounted for in published papers, a first-of-its-kind study suggests. The analysis found that only one-quarter of more than 5500 lab animals used over a 2-year period at one university in the Netherlands ended up being mentioned in a scientific paper afterward. The researchers believe the pattern could be similar at institutions around the world, resulting in potentially millions of animals disappearing from scientific studies.

"I think it's just outrageous that we have such a low rate of results published for the number of animals used," says Michael Schlüssel, a medical statistician at the University of Oxford who was not involved in the study. "If we only look for groundbreaking research, the evidence base won't be solid," he adds. And that could impact studies that may confirm or refute the benefits of certain drugs or medical interventions." <<more>>

Amid pandemic, U.S. faculty job openings plummet

From *Science*, by Katie Langin. Posted on October 6, 2020

"The scarcity of academic jobs is a perennial problem for U.S. science trainees. But this year,

Grants and Fellowship Opportunities

across STEM disciplines, faculty job openings at U.S. institutions are down 70% compared with last year, according to an analysis of job advertisements on the Science Careers job board. (The Science Careers news team operates independently from the job board.) Only 173 U.S.-based jobs were posted between July and September this year, compared with 571 during the same period last year. Non-U.S. job postings dropped by 8%.” [<<more>>](#)

The Virus Moved Female Faculty to the Brink. Will Universities Help?

From *The New York Times*, by Jillian Kramer. Posted October 6, 2020.

“The pandemic has laid bare gender inequities across the country, and women in academia have not been spared. The outbreak erupted during universities’ spring terms, hastily forcing classes online and researchers out of their laboratories. Faculty with young or school-aged children — especially women — had to juggle teaching their students with overseeing their children’s distance learning from home.

Many universities struggled to put meaningful policies in place to help faculty, especially caretakers and women.” [<<more>>](#)

Why *Nature* needs to cover politics now, more than ever

From *Nature*, by Staff. Posted on October 6, 2020

“Since *Nature*’s earliest issues, we have been publishing news, commentary and primary research on science and politics. But why does a journal of science need to cover politics? It’s an important question that readers often ask.

“This week, *Nature* reporters outline what the impact on science might be if Joe Biden wins the US presidential election on 3 November, and chronicle President Donald Trump’s troubled legacy for science. We plan to increase politics

coverage from around the world, and to publish more primary research in political science and related fields.

“Science and politics have always depended on each other. The decisions and actions of politicians affect research funding and research-policy priorities. At the same time, science and research inform and shape a spectrum of public policies, from environmental protection to data ethics. The actions of politicians affect the higher-education environment, too. They can ensure that academic freedom is upheld, and commit institutions to work harder to protect equality, diversity and inclusion, and to give more space to voices from previously marginalized communities. However, politicians also have the power to pass laws that do the opposite.” [<<more>>](#)

Safe resumption of research important, feasible

From *Science Daily*, by Staff. Posted on October 5, 2020

“While guidelines from federal and state government and medical specialty societies currently exist to help restarting health services and resuming clinical trials, no clear guidance is available to aid resumption of HPR at community-based, observational cohort studies.

“In a narrative review in the *Journal of the American Heart Association*, researchers from the Boston VA Healthcare System and Boston University School of Medicine (BUSM), describe a potential path forward for safely reopening community-based observational studies, drawing on scientific knowledge and best practices from a variety of medical and lay sources.” [<<more>>](#)
