# Grant Opportunities & News You Can Use

Hello, faculty,

We did it! We made it to the end of the semester, pretty much. I hope your finals are all settled soon and you can find some time to rest with your family.

Before jumping into the newsletter, I wanted announce a new way to chat with us—office hours!  That's right, the Institutional Funding and Sponsored Research Team will be hosting monthly virtual office hours! The first Friday every month at 10 AM, we will be on Zoom to talk about anything you like—reports, projects, writing your first proposal, our secret feats of derring-do. **Our first virtual office hour will be Friday February 4, 2022 at 10 AM.** I'll update with information about how to join when it gets a little closer.

We're back with our last edition of our Grant Opportunities Newsletter for 2021. Shall we?

This month we have a Featured Funder column with updates on the Foundation formerly known as Woodrow Wilson.  For Sage Advice, we are sharing an article about budget justifications and how to structure them. For The History of American Philanthropy, we get to hear all about the underhanded dealings at Dartmouth that ended in an 1819 Supreme Court case about the ability of states to dictate the mission of non-profits.

We have news stories and brief thumbnails of opportunities coming due in February. And in the back, we have six months' worth of deadlines.

The next Internal Grants Deadline is January 25th, for Barnard Faculty Research Grants and for Tow Award for Innovative and Outstanding Pedagogy Proposals.

That's it for us. Please reach out if we can be of any help. Safe travels and stay safe!

**Institute for Citizens and Scholars (Formerly the Woodrow Wilson Foundation)**

The last time we talked about the Institute for Citizens and Scholars, it was called the Woodrow Wilson Foundation. It has been a year since it announced its new name in the wake of a racial reckoning, so it seemed like a good time to revisit the organization and see how its priorities have changed.

The Institute began once upon a time, in a faraway land called New Jersey, where there were not enough professors. (I'm sorry, I can't explain this origin story in any other way.) It was 1945, the G.I. Bill had just been passed when a Classics professor named Dr. Whitney "Mike" Oakes at Princeton realized there was about to drastic shortage of professors. So he started a batch of fellowships named after Woodrow Wilson, Princeton's most (in)famous president, to encourage G.I.s to enter college teaching. Other organizations quickly recognized the need for the program and with some help from the Ford Foundation, the Woodrow Wilson Fellowships quickly became an independent organization. From the 1970s-1990s, the Woodrow Wilson Institute focused its attention on building bridges between colleges and K-12, as well as promoting humanities in the public sphere. When the early 2000s arrived, the Foundation redoubled its interest in improving K-12 education. And in 2020, when the organization confronted Wilson's racist legacy, it changed its name and "expanded its mission to include broadening civic engagement, supporting civil discourse, and reemphasizing excellence, opportunity, and diversity in higher education."

Today, the Institute for Citizens and Scholars offers several different faculty awards, in addition to Dissertation Fellowships.

"The Junior Faculty Career Enhancement Fellowship seeks to increase the presence of minority junior faculty members and other faculty members committed to eradicating racial disparities in core fields in the arts and humanities." **Funding:** $30,000 with $1,500 for travel. **Deadline:** TBA, previously October 22, 2021.

"The Adjunct Faculty Fellowship provides each Fellow with a six-month period during which to focus on the research and scholarship necessary to secure a tenure-track position. Two fellowships are awarded each year." **Funding:** $10,000. **Deadline:** TBA, Previously November 5, 2021.

"The Mellon Emerging Faculty Leaders Award supports tenure-track faculty who have passed their midpoint review. The award is structured to free the time of junior faculty who have passed their midpoint tenure review—including those from underrepresented groups and others committed to eradicating disparities in their fields—so that they can both engage in and build support systems, networks, and affinity groups that make their fields and campuses more inclusive. Eligible applicants must have passed their third-year review or their institution's equivalent." **Funding: $**17,500 stipend—$10,000 to be used for summer research support and $7,500 for research assistance during the academic year. **Deadline**: TBA. Previously December 1, 2021.

This last opportunity isn't strictly for funding, but might be of interest to any readers out there who has benefited from Mellon Mays Undergraduate Fellows. The Institute advertises a program for The Mellon Mays Gap Assistance Program (Mellon Mays GAP), which "helps Mellon Mays Fellows who have recently graduated maintain their graduate school ambitions and progress towards an academic career."

## How to Structure Your Budget Justification

The budget justification can be one of the more mysterious documents if you're new to grant writing. After all, presumably you've explained in the proposal what you're doing and why, while your budget gives the details of how much you're spending on any given category, so what, exactly, does a written description of your budget lines accomplish? And how do you write a good one?

The short answer to the first question is that a budget justification is all part of your campaign to make your budget look credible. You want to prove to your funder that you've thought about your project, have a good sense of what the components are, roughly how much they will cost, and—crucially— where you are getting that number from. It's a way of showing that you're a sensible, trustworthy person who won't blow their money on top-shelf bourbon for your conferences or come back six months later because you forgot to include health insurance when budgeting for a postdoc.

As for the question of what makes a good budget justification, we recently ran across an article on exactly that topic on the *Blog of the Division of Integrative Organismal Systems (IOS) at the National Science Foundation*. The article, titled "How to structure your budget justification to assure the project budget is well justified," is written with NSF applications in mind, but a lot of their tips apply to any grant. Check out some of the highlight below!

> **"1) It is helpful to use the exact terminology that appears on the budget form** and to discuss the items in the order they appear on the form. For instance, you can allocate expenditures in categories A. Senior Personnel, B. Other Personnel, C. Fringe Benefits, D. Equipment, E. Travel, F. Participant Support Costs, and G. Other Direct Costs. In your budget justification, you would then use these categories **exactly as designated** in the budget form as headers to describe each expenditure. If no funds are requested within a category, you would leave that category/ header out of the budget justification. Please note that it is important to always use headers as designated in the budget form for maximum clarity. This is even more important when you begin to detail the subcategories within each larger category, for example, when describing G. Other Direct Costs, which includes 1. Materials and supplies, 2. Publication costs, etc.

> **"2) Provide enough information about the roles of the personnel** that are being supported on the project to justify their time commitment, and therefore the salary support, being requested."

> **"3) Provide enough details to justify larger budget numbers** so that a reader can understand what those funds will cover and how you arrived at the total. Take this approach throughout the budget, especially when justifying requests for funds in categories such as E. Travel or G. 1. Materials and Supplies where allocations often sum to a large dollar amount. Here is where it is important to provide enough detail so that the reader and NSF understand the rationale for the expenditures.

> "As an example, suppose you are requesting funds for lab supplies and the justification for G.1. Materials and Supplies reads, 'Lab Supplies: $10,000'. A more informative budget justification would read 'Total Lab Supplies $10,000, including Animal husbandry supplies (food, tank cleaning, environmental enrichment): $3,000, Experimental aquaria (10 x $500 each): $5,000, Reagents and disposables for hormone assays: $2,000'."

# The History of American Philanthropy

When we last left off, the United States had finally won independence from Britain and was faced with a conundrum: What laws should the new country use? The colonies had been operating under British common law, but wasn't it a bit counterproductive to go through all of the effort of a war, just to keep the same old legal system from the aristocratic Old World? Wasn't the whole point to break from that ossified culture and embrace what made the country distinctively new? But on the other hand, what should the new laws be? And what legal system should you use while you were sorting that out?

For the most part, the states sorted out the issue of inheritance and charity in the early years of the country, but occasionally the states conflicted or residents objected to state law. Now, you might find yourself thinking, "This sounds like the sort of problem the Supreme Court is supposed to sort out." And I agree! It *does* sound like the sort of thing the Supreme Court should settle. Only, a lot of their early cases only made the status of inheritance law even less clear.

Take the 1819 case, Dartmouth College vs. Woodward. Dartmouth College was founded in 1769 by Eleazar Wheelock (1711-1779). Wheelock was part of that long, American tradition of colonialism mixed with proselytizing that we saw in the early years of Harvard. Before moving to New Hampshire to found Dartmouth, he had launched and ran Moors Charity School in Connecticut to educate Native Americans. The school was inspired by his early experience teaching Samson Occom, a Mohegan boy who had converted to Christianity. Occam became a missionary after studying for four years with Wheelock and Wheelock hoped to train other Native American boys to do the same. Few of his students fulfilled his hopes. Some grew homesick, some sickened, and some died.

Undaunted, Wheelock decided to raise money for the school and soon received a number of donations from wealthy English philanthropists, as well as a charter from King George III. Money in hand, he decided to start a second branch of the school, this time with classes for American colonists, and settled on a new location in Hanover, New Hampshire. The wealthy donors back in England howled. Wheelock coolly kept the money and named the college after the head of the Board of Trustees placed in charge of the school—Lord Dartmouth.

Eleazar Wheelock was succeeded by his son, John Wheelock (1754-1817), and that's who ultimately triggered the chain of events that ended in a Supreme Court case. Wheelock was neither an academic, nor a minister, but he steered Dartmouth through its early years capably enough. He oversaw the construction of Dartmouth Hall and founded the medical school. He even kept the college solvent throughout the Revolutionary War. In his later years, though, he began to squabble with the Dartmouth's Board of Trustees. Eventually the fighting grew heated enough that Wheelock convinced the governor of New Hampshire to turn Dartmouth College into a secular state school, Dartmouth University, and replace the previous board with supporters of Wheelock. The new board promptly elected Wheelock president. The old board sued—not Wheelock, but William Woodward, the treasurer of the college who had taken the college's charter, records, and seal to the new established university.

That's the lawsuit that made it to the Supreme Court, which ultimately ruled in favor of the original board. Dartmouth's original charter had been a contract. By replacing the board and changing the mission, New Hampshire had violated that contract. Just as importantly, the Court ruled, generations of donors had given to the college in hopes that the institution would exist in perpetuity. If the state had the power to seize a philanthropic entity and change its stated purpose, individuals wouldn't have much incentive to donate to good causes. It was an important moment in the creation of U.S. charity law because it definitively established certain protections for philanthropic organizations—or at least the formally incorporated ones.

### Tool protects users' private data while they browse

Posted by Staff December 14, 2021.

"Computer scientists funded by the U.S. National Science Foundation and affiliated with the University of California San Diego and Brave Software have developed a tool that will increase protections for users' private data while they browse the web.

"The tool, named SugarCoat, targets scripts that harm users' privacy -- for example, by tracking their browsing history around the web -- yet are essential for the websites that embed them to function. SugarCoat replaces these scripts with others that have the same properties, minus the privacy-harming features. SugarCoat is designed to be integrated into existing privacy-focused browsers like Brave, Firefox and Tor as well as browser extensions like uBlock Origin. SugarCoat is open source and is currently being integrated into the Brave browser." <<more>>

### NIH Director Francis Collins to Hand Reins to Acting Director Lawrence Tabak on December 20

From *Science Magazine* by Jocelyn Kaiser. Posted December 9, 2021.
"Lawrence Tabak, principal deputy director of the National Institutes of Health (NIH), will become the agency's acting director on 20 December—the day after current Director Francis Collins leaves his post, the Department of Health and Human Services said today. Collins, the physician-geneticist who has served as head of the $43 billion NIH for 12 years, announced in October that he would resign by year's end, but his departure date had been unclear." <<more>>

### Expanded Website Outlines How to Support Safe and Respectful Workplaces at Institutions that Receive NIH Funding

By Mike Lauer. Posted October 29, 2021

"We have updated our anti-sexual harassment website to encompass the range of threats to safe and respectful workplaces at institutions receiving NIH funding. The updated site outlines actions NIH can take to address different forms of harassment, how to notify us (which can be anonymous), resources to evaluate workplace climate, and frequently asked questions. It also has a new section where you can easily find information on the numbers and types of harassment cases NIH handles involving projects at NIH-supported institutions, and the resulting actions." <<more>>

**Long-Term Trends in the Age of Principal Investigators Supported for the First Time on NIH R01-Equivalent Awards**

By Mike Lauer.  **Posted November 18, 2021**

The R01 (or R01-equivalent) grant has traditionally been a critical component to the launch of one's research career. A number of academic leaders have described and expressed concerns about the age at which scientists are first supported on an R01 award ("age at first R01"). The biomedical research workforce is aging over the past several decades due to demographic trends and the end of mandatory retirement in academia.  Difficulties faced by early-career investigators may include prolonged training, advantages of incumbency, and cost-shifting to universities.

**FOREST FIGHT: Germany invented "scientific" forestry. But a huge dieback triggered by climate change has ignited a fierce debate over how the nation should manage its trees.**

From *Science Magazine,* by Gabriel Popkin*.* "Since 2018, more than 300,000 hectares of Germany's trees—more than 2.5% of the country's total forest area—have died because of beetles and drought fueled by a warming climate. The massive dieback has shocked the public. And it has raised hard questions about how a country renowned for inventing "scientific" forestry more than 3 centuries ago should manage forests so they can continue to produce wood and protect ecosystems in the face of destablizing climate shifts." <<more>>

**Few foundations give groups they support decision-making power on funding priorities**

From *The Conversation* by Beth Daley. Posted November 2, 2021.

"Eighty-three percent of large U.S. foundations seek input from some of the nonprofits they fund – along with other people, organizations or communities directly affected by their funding. But foundations, which aim to serve the public interest through the money they give away, rarely give these stakeholders decision-making authority – by either letting them help set priorities or giving them a say about where grant money flows. That is what philanthropy scholars Kelly Husted, David Suarez and I found in a study that assessed the practices of the 500 largest U.S. foundations. Our findings suggest that foundations, which face mounting pressure to direct more grants to underserved communities as part of the widespread reckoning on race underway in America, have incorporated some stakeholder outreach into their work." <<more>>

**American College Health Association**
**FirstRisk Advisors Initiatives in College Mental/**
**Behavioral Health Funding Opportunity**
Deadline: February 1, 2021
"With growing national concerns regarding the prevalence and complexity of mental and behavioral health issues among college students and the negative impact these disorders have on the health and safety of higher education communities, student retention, student learning/academic progress, and the human potential of students, funding sponsor FirstRisk Advisors, through the American College Health Foundation, is offering one annual $3,500 funding opportunity. The FirstRisk Advisors Initiatives in College Mental/Behavioral Health Funding Opportunity is designed to fund the development of creative initiatives that address prevention, early intervention, and treatment for mental and behavioral health disorders among students." <<more>>

**National Academies of Science, Engineering, Medicine National Research Council**
**Research Associateship Programs**
Deadline: February 1, 2022
"The NRC Research Associateship Programs (RAP) promote excellence in scientific and technological research conducted by the U.S. government through the administration of programs offering graduate, postdoctoral, and senior level research opportunities at sponsoring federal laboratories and affiliated institutions." <<more>>

**Society for the Teaching of Psychology**
**Instructional Resource Award**
Deadline: February 1, 2022
"Up to five grants of $1,500 each will be presented annually to enable recipients to complete substantive instructional research projects related to the teaching of psychology suitable for posting on the Society for the Teaching of Psychology (STP) website as a teaching resource. Or, if the project is an empirical study, for publication in Teaching of Psychology or another SoTL journal. Proposals may be general in focus or specific to a particular psychology course or student population. <<more>>

**American Philosophical Society/NASA**
**Lewis and Clark Fund for Field Research in Astrobiology Grants**
Deadline: February 1, 2022
"The Lewis and Clark Fund for Exploration and Field Research in Astrobiology is open to field studies in any area of interest to astrobiology. Applications will be reviewed by a committee that includes members of the NASA Astrobiology Institute, the APS, and the wider science community as needed. Recipients will be designated as Lewis and Clark Field Scholars in Astrobiology." <<more>>

**National Science Foundation**
**Frontier Research in Earth Sciences**
Deadline: February 2, 2022
"The FRES program will support research in Earth systems from the core through the critical zone. The project may focus on all or part of the surface,

continental lithospheric, and deeper Earth systems over the entire range of temporal and spatial scales. FRES projects should have a larger scientific scope and budget than those considered for funding by disciplinary programs in the Division of Earth Sciences (EAR)." <<more>>

**Society for the Advancement of Behavioral Analysis**
**International Development Grant**
Deadline: February 2, 2022
"Two to four $1,000 International Development Grants will be distributed annually to persons or organizations interested in developing behavior analysis internationally. In order to promote behavior analysis on a worldwide scale, we hope to increase opportunities for people and organizations that do not have the necessary resources to expand important information and knowledge." <<more>>

**National Institutes of Health**
**R01 Research Grants**
Deadline: February 5, 2022
"The Research Project (R01) grant is an award made to support a discrete, specified, circumscribed project to be performed by the named investigator(s) in an area representing the investigator's specific interest and competencies, based on the mission of the NIH." <<more>>

**National Science Foundation**
**A Science of Science Policy Approach to Analyzing and Innovating the Biomedical Research Enterprise (SCISIPBIO)**
Deadline: February 9, 2022
"The National Science Foundation (NSF) and the National Institutes of Health (NIH) are interested in proposals that will propel our understanding of the biomedical research enterprise by drawing from the scientific expertise of the science of science policy research community." <<more>>

**National Science Foundation**
**Cognitive Neuroscience**
Deadline: February 11, 2022
"The Cognitive Neuroscience Program seeks highly innovative proposals aimed at advancing a rigorous understanding of the neural mechanisms of human cognition. Central research topics for consideration by the program include attention, learning, memory, decision-making, language, social cognition, and emotions. Proposals with animal models are appropriate only if they include a comparative element with human subjects." <<more>>

**Burroughs Wellcome Fund**
**Collaborative Research Travel Grant**
Deadline: TBA. Previously February 12, 2020
"The Collaborative Research Travel Grant (CRTG) program provides up to $15,000 in support for relatively unrestricted travel funds to academic scientists (faculty and postdocs) at U.S. or Canadian degree-granting institutions. Grants must be used for domestic or international travel to another lab to learn new research techniques or begin or continue a collaboration to address biomedical questions. All proposals must be cross-disciplinary. Applicants with a doctoral degree in the physical, mathematical, or engineering sciences working on a biological problem are encouraged to apply." <<more>>

**Burroughs Wellcome Fund**
**Innovation in Regulatory Science**
Deadline: February 12, 2021
"BWF's Innovation in Regulatory Science Awards provides up to $500,000 over five years to academic investigators developing new methodologies or innovative approaches in regulatory science that will ultimately inform the regulatory decisions the Food and Drug Administration (FDA) and others make." <<more>>

**American Psychological Foundation**
**Dr. Chrstine Blasey-Ford Grant**
Deadline: February 15, 2022
"The Dr. Christine Blasey-Ford Grant will provide up to $1,500 to support innovative work to support graduate students and early career researchers conducting work focusing on the understanding, prevention and/or treatment of

the consequences of exposure to traumatic events such as sexual assault, sexual harassment and/or rape." <<more>>

**American Psychological Foundation**
**Trauma Psychology Grant**
Deadline: February 15, 2022
One grant of up to $3,500 to support innovative work to alleviate trauma. <<more>>

**Esther A. & Joseph Kingenstein Fund**
**Fellowship Awards in the Neurosciences**
Deadline: February 15, 2022
"The Klingenstein-Simons Neuroscience Fellowship supports innovative research by early career investigators. The research should have relevance for understanding the mechanisms underlying any of a wide range of neurological and behavioral disorders, and it may lead to improvements in the diagnosis and treatment of these disorders. We recognize, however, that some of the most important contributions towards disease cures can come from basic research, without an immediate understanding of their relationship to disease, and will continue our support of basic research."
<<more>>

**National Science Foundation**
**Ocean Technology and Interdisciplinary Coordination**
Deadline: February 15, 2022
"The Oceanographic Technology and Interdisciplinary Coordination (OTIC) Program supports a broad range of research and technology development activities. Unsolicited proposals are accepted for instrumentation development that has broad applicability to ocean science research projects and that enhance observational, experimental or analytical capabilities of the ocean science research community." <<more>>

**National Institutes of Health**
**R21, Exploratory/Developmental Grant and R33, Exploratory/Developmental Grant Phase II**
Deadline: February 16, 2021
"The NIH Exploratory/Developmental Grant

supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research." <<more>>

**National Institutes of Health**
**R34, Clinical Trial Planning Grant**
Deadline: February 16, 2021
"An NIH-defined Phase III clinical trial is a broadly based prospective clinical investigation, usually involving several hundred or more human subjects, for the purpose of evaluating an experimental intervention in comparison with a standard or control intervention or comparing two or more existing treatments. Often, the aim of such investigation is to provide evidence leading to a scientific basis for consideration of a change in health policy or standard of care. The definition includes pharmacologic, non-pharmacologic, and behavioral interventions for disease prevention, prophylaxis, diagnosis, or therapy. Community- and other population-based intervention trials also are included." <<more>>

**Institutes for Advanced Study**
**Women and Mathematics**
Deadline: February 17, 2021
"The Women and Mathematics Program (WAM) at the Institute for Advanced Study is an annual program with the mission to recruit and retain more women in mathematics. WAM aims to counter the initial imbalance in the numbers of men and women entering mathematics training as well as the higher attrition rate of female mathematicians compared to their male counterparts at every critical transition stage in mathematical careers. WAM encourages female mathematicians to form collaborative research relationships and to become active in a vertical mentoring network spanning a continuum from undergraduates to emerita professors, which provides support and reduces the sense of

isolation experienced by many women in mathematics." <<more>>

**New York Stem Cell Foundation**
**Investigator Awards**
Deadline: February 16, 2022
"NYSCF is soliciting applications from early career investigators for Innovator awards in neuroscience. The goal of this initiative is to foster truly bold, innovative scientists with the potential to transform the field of neuroscience. Applicants are encouraged in all areas of neuroscience, and NYSCF is committed to supporting the field as broadly as possible through these awards. Applicants need not be working in areas related to stem cells or related areas." <<more>>

**National Institutes of Health**
**R03 Small Research Grants**
Deadline: February 24, 2022
"The NIH Small Research Grant Program supports small research projects that can be carried out in a short period of time with limited resources. This program supports different types of projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology." <<more>>

**National Institutes of Health**
**Academic Research Enhancement Award (AREA)**
**R15 Grants**
Deadline: February 25, 2022
"Supports small-scale research projects at educational institutions that provide baccalaureate or advanced degrees for a significant number of the Nation's research scientists but that have not been major recipients of NIH support.
The goals of the R15 are to: support meritorious research, expose students to research, and strengthen the research environment of the institution." <<more>>

**Engineering Information Foundation**
**Women in Engineering Grant Program**
Deadline: February 28, 2022
"Our grant activity supports developmental projects, instructional projects, and training programs in engineering education and research that fit our fields of interest. These currently include the availability and use of published information, women in engineering, and information access in developing countries." <<more>>

**American Association for Clinical Chemistry**
**Outstanding Scientific Achievement Awards**
Deadline: February 28, 2022
"Nominations will be accepted for the following awards that recognize outstanding achievements in the field of laboratory medicine: Outstanding Lifetime Achievement Award in Clinical Chemistry and Laboratory Medicine, Outstanding Contributions Through Service to the Profession of Clinical Chemistry, Outstanding Contributions to Education in Clinical Chemistry, and Outstanding Scientific Achievements by a Young Investigator." <<more>>

**American Association for Clinical Chemistry**
**Outstanding Scientific Achievements by a Young Investigator**
Deadline: February 28, 2021
"This award recognizes and encourages the professional development of a young investigator who has demonstrated exceptional scientific achievements early in his or her career. It is given based on the degree of originality exhibited in the individual's creative process and the significance of the research conducted relevant to the field of clinical laboratory medicine. It is conferred upon an individual who has the potential to be an outstanding investigator of the future." <<more>>

**Simons Foundation**
**Collaboration on the Global Brain 2019 Courses and Conferences**
Deadline: TBA. Previously February 28, 2020
"The Simons Collaboration on the Global Brain (SCGB) is accepting applications for funding of

courses, conferences, and workshops relevant to the SCGB mission. Of particular interest are courses that focus on training in computational and theoretical neuroscience. Conferences that focus on the fields of systems and computational neuroscience are also encouraged to apply."
